Data Center Access

- **Data center-class performance**

- DC modularization with GbE ToR solution
- Wire-speed performance: 48 to 136 Gbps
- 128,000 MAC addresses, 32,000 IPv4 routes
- Deep packet buffers
- Low latency
- Front-to-back airflow

- **Optimum flexibility**

- 24- and 48-port copper and fiber models
- All models are field-upgradable to 2-port 10 GbE

- **High availability**

- Designed for NEBS Level 3 compliance
- Hot-swappable, redundant, load-sharing AC/DC power supplies
- N+1 redundant, replaceable cooling system

- **Advanced software features**

- Virtualization through multi-VRF
- Full IPv4 unicast and multicast capabilities
- Advanced QoS capabilities
